DETAILED ACTION

1. Claims 1 to 15 are presented for examination.

Allowable Subject Matter

2. Claims 1 to 15 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a method for generating sampling signals for use in an active matrix display.

Independent claim 1 identifies a uniquely distinct feature "generating a guarding signal having alternate first level and second level and outputting sampling signals associated with said pulse signals in response to said guarding signal being at said first level, and exempting from outputting any sampling signal when said guarding signal is at said second level".

Independent claim 7 identifies a uniquely distinct feature "performing logic operations on said guarding signal and said plurality of pulse signals to obtain respective logic values, and outputting sampling signals according to said logic values. "

Independent claim 11 identifies a uniquely distinct feature "a logic operation circuit electrically connected to said pulse signal generator and said guarding signal generator, receiving said plurality of pulse signals and said guarding signal, and performing a logic operation on each of said plurality of pulse signals with said guarding

signal to realize a logic state, and outputting a sampling signal only when said logic state is logically high".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6,492,972 (Kubota et al.) and 5,818,412 (Maekawa).

The closest arts, Kubota et al and Maekawa as discussed above, either singularly or in combination, fail to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jean Lesperance whose telephone number is (571) 272-7692. The examiner can normally be reached on from Monday to Friday between 10:00AM and 6:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (571) 272-7691.
